

Partner and developer certification requirements – Sage Partner Cloud

Last updated: August 2021

The certification requirements for Sage Partner Cloud ensure that partners maintain the knowledge to use the Sage Provisioning Portal and deliver the highest levels of quality and support to Sage customers.

Any partner's consultant that will utilise the Sage Provisioning Portal **must** complete the Sage Provisioning Portal training certification course and pass the certification assessment.

Note: if you also choose to sell Sage 200 Standard on Sage's Azure subscription this is a separate course. For the purpose of this document, Sage refers to the sale of Sage 200 Professional. If you wish to sell both Sage 200 Professional and Sage 200 Standard, certification via both courses is required.

To pursue this certification, it is recommended that the consultant have knowledge and experience with Microsoft Azure competencies. The Sage certification training package consists of:

- Anytime e-learning course
- A required assessment.

Upon registration for the exam, partners will receive two attempts to pass with a score of 80% or higher to become certified.

Partners must **maintain** a minimum of two valid certified consultants linked to their account. If a certified consultant should leave the partner's business, the partner must replace the consultant within **30 days**. Failure to do so will result in the suspension of the ability to sell through the portal to new customers. Existing ones can be maintained.

Where the partner is a developer only and is not a Value Added Reseller (VAR), the minimum number of valid certified consultants required is one.

Certification maintenance training and assessments will only be required if there are significant changes to the Sage Provisioning Portal. Any significant changes will be communicated to all partners.

At this time, the Sage Provisioning Portal certification is offered in line with our Sage Partner Success and Partner Success Plus Programs.

Detailed certification requirements can be found on Sage University. Select your Sage product to find the details of the Sage Partner Cloud Provisioning Portal Certified Consultant certification.

If you need any assistance with booking the certification training or assessment, reach out to the [Sage University Team](#).
